

Candidate Interview Report

Candidate: "Moloko Magwai",
Experience Level: Intermediate
Technology: Java

Interview Result

Score: 0 / 10

Coding Challenge Result

Score: 10
Verdict: pass

Feedback:

The candidate provided a correct and efficient solution using a HashMap to achieve $O(n)$ time complexity, which is optimal for this problem. The code is clean, well-commented, and follows standard Java practices. The candidate also appropriately throws an exception if no solution is found, acknowledging the problem constraint that a solution always exists. No improvements are necessary for correctness or efficiency; optionally, one might skip the exception and return null or an empty array, but this is a minor style preference.
